

# PROVA DE INGLÊS

**INSTRUCTIONS:** Read the text below and then choose the alternative which correctly completes the following statements.

## A Diagnosis at your Drugstore?

Want to check your cholesterol or thyroid levels? You may not need a doctor's appointment: A number of pharmacies offer such "behind the counter" services, which get pharmacists and customers to interact closely.

- 5 "Patients see pharmacists more than doctors," says Rebecca Chater of Kerr Drug, "and it's easier than making a doctor's appointment."

Pharmacy chains including Rite Aid and Kerr offer patient-care services at select stores. You pay \$10-\$50.

- 10 How do doctors feel about this? "We want our patients to have access to quality care" says Dr. Michael Fleming of the American Academy of Family Physicians. "If patients are getting the information they need and are being provided with good care, we're all for it."

These services aren't meant to replace regular doctor visits, so ask the pharmacist to send your physician the results.

FIELDS, Lisa Miller. *Reader's Digest*, July 2005.

### QUESTION 19

... such "behind the counter" services (lines 2-3)

In the text, this phrase refers to
